PROFILE

I'm a Front-end developer with a foundation in design and a focus on building responsive, user-friendly interfaces. Fluent in English and Portuguese, and currently pursuing a Bachelor's in Computer Software Engineering to deepen my technical expertise.

EDUCATION

Bachelor student in Computer Software Engineering
FullStack Web Developer
UX/UI Design

EXPERIENCE

I have deep knowledge of front-end technologies such as React, Js, Typescript, Styled Component, Tailwind CSS and basic frameworks, focusing on creating functional and user-friendly applications. As of UX/UI design, I am fond of working on Figma: wireframing, prototyping and crafting visually intuitive interfaces - both mobile and websites.

SKILLS

- Proactivity.
- Responsibility
- Accountability
- Flexibility
- Adaptability
- Active Listening
- Time Management
- People Management
- Problem Solving Mindset
- Attentive to details

PROFESSIONAL SUMMARY

I'm a passionate and curious tech enthusiast with a strong foundation in UX/UI design, where I first explored the world of digital creativity using Figma. That initial spark quickly led me to discover my true passion—developing web applications. To turn that passion into practical skills, I enrolled in an immersive, on-site Full Stack Web Development course.

Currently, I specialize in front-end development, with a focus on building clean, responsive, and engaging user interfaces using technologies like React, Javascript, Typescript, Tailwind and Styled Components. I love transforming ideas into great digital experiences that are both functional and visually compelling.

In addition to my technical expertise, I bring a strong set of soft skills to every project:

- A collaborative team player who thrives in dynamic environments
- A lifelong learner, always seeking to expand my knowledge
- Deeply curious and analytical about how systems work
- Highly motivated by challenges and passionate about solving problems
- I'm also fluent in both English and Portuguese, which allows me to communicate effectively across diverse teams and global projects.

To deepen my understanding of the development world, I'm currently pursuing a Bachelor's degree in Computer Software Engineering. My goal is to continue evolving as a developer and contribute to building meaningful, user-centered digital experiences that improve everyday life.

I also have experience in IT support and marketing coordination. At the Madre de Deus de Minas City Council, I was responsible for providing technical support and ensuring the stability of the network and operating systems. As the Marketing Coordinator for an academic league, I developed and executed digital communication strategies, managed social media, and led the team in event promotion, increasing engagement and participation of the target audience."
